

The future in tailored shed systems

Superior Shed Systems are Australia's leading suppliers of high quality, custom designed and engineered sheds.

Can't find an off-the-shelf shed to meet your needs? We can design and manufacture a shed that's tailored to your site and meets your exact specifications. From simple structures through to multi-room liveable sheds, we have the experience and expertise to transform your idea into a beautiful, highly functional reality.

Your shed, your way

- Now you can build a shed on tricky sites unsuited to pre-designed off the shelf kits (e.g. sloping, over-sewer and filled sites).
- No compromise. From roof height and pitch to the number of doors and windows, every element of your shed, from the slab up, is tailored to your individual taste and exact needs.
- We can provide design advice to ensure your shed looks great, is cost-effective to build and highly functional.
- Complete end to end service from concept to completion. Once you approve your design and quote, we'll prepare the site-specific plans required for council approval to expedite the building process.

Built tough for Australian conditions

When you choose a customised Superior Shed Systems solution, you can be assured you are getting the best. Every shed we design and build is engineered and tested to exceed industry standards, and to withstand the rigours of time and the harsh Australian environment. Your Superior Shed will be more comfortable to work, live or play in.

- We use Australian-made BlueScope Steel for maximum durability.
- Fully bolted portal frame system with heavy duty G450 brackets.
- 15% overlapping on roofing and walling girts for added strength and weatherproofing.

Fast and cost-effective

Our sheds feature a range of smart, innovative design mechanisms for efficient and cost-effective construction.

SUPERIOR SHED
SYSTEMS

**CUSTOMISED,

The Superior Choice

SUPERIOR QUALITY

Roofing components are manufactured by BlueScope Steel, Australia's largest steel manufacturer. Our sheds are also fully compliant with Australian Building Regulations and Standards.

SUPERIOR DESIGN

Our smart design systems combine faster, more economical construction with superior performance and structural integrity.

SUPERIOR COLOUR RANGE

Sheds are available in the full Colorbond® colour range including Colorbond®XRW, Ultra and Metallic steel.

SUPERIOR STRENGTH

Superior Shed Systems are designing for long-term strength and durability.

SUPERIOR CONVENIENCE

A Superior Shed is virtually maintenance-free, requiring little more than an occasional wash-down.

Get the shed you want. Quick. Smart.
